Brushless impact driver powered by YATO 18V platform battery. Its main advantage is its very short body length of 90 mm. This makes it possible to work in hard-to-reach places and to press the screw perpendicularly against the material. The 4-position adjustment of tightening and loosening torque protects the user from bolt breakage and overtightening. The tangential impactor prevents the bit from skipping during screwdriving. The screwdriver is equipped with a durable hex tool holder. The screwdriver has thermal overload protection.

- brushless motor
- maximum torque: 230Nm
- rotation speed: 0-1200 / 0-1900 / 0-2500 / 0-32 min⁻¹
- impact frequency: 3000 min⁻¹
- toolholder size: 1/4" (6.3 mm)
- tool holder type: hexagonal (hex)
- electronically adjustable speed
- spindle brake
- direction of rotation switch
- lighting at night
- battery charge indicator
- weight: 1 kg
